

Due to the weather and the increased wind most of the stages had to be changed at the last minute, yardages below are an estimate, but it is ultimately up to the shooter to confirm distances. Additionally it is entirely the shooters responsibility to select good firing positions that allows the shooter to engage targets, you'd be wise to walk the props and make a stage plan for each stage (but remember no resting gear on props during stage walk). All targets are numbered from left to right, so no funny business. I put a lot of time into this match, just to have to change it at the last minute, so I hope you enjoy! There will be ample fire extinguishers spread out, we will cover this in the safety brief, but spotters are expected to watch for any signs of smoke, if smoke is seen spotter will immediately say over the radio "fire cease fire" at this command all shooters will cease fire and dedicated e-moto riders will respond, please be prepared to lend a helping hand, and if you've got a shovel, it wouldn't hurt to bring it just in case.
